Best Practice I : Organic Farming Awareness Programme

1. Title of the Practice

Organic Farming Awareness Programme

2. Objectives of the Practice

- To acquaint farmers with a what is organic farming.
- To make aware of the benefits of organic farming
- To promote organic farming for quality crop yield

3. The Context

Nowadays, we are facing lot of health problem. We became part of Green Revolution and adapt with new technology. Farmers raised Polly houses and green houses to produce more crop in less time. For the same, they use chemical fertilizers, insecticide and pesticide in more quantity. Farmers produce more amount crop but it affects nutritious value and health. Therefore, there is drastic need to have organic farming. Organic farming works in harmony with nature rather than against it. This involves using techniques to achieve good crop yields without harming the natural environment or the people who live and work in it. The college resolved to make farmers aware of the benefits of the organic farming. If farmers are engaged in organic farming, they will produce quality crops. To be a successful organic farmer, the farmer must not see every insect as a pest, every plant out of place as a weed and the solution to every problem in an artificial chemical spray. The aim is not to eradicate all pests and weeds, but to keep them down to an acceptable level and make the most of the benefits

4. The Practice

Organic Farming is necessary to yield the crop to overcome the health problem faced due to Green Revolution in India. It is drastically required to study and due research in the field of organic farming. The college resolved to choose Organic Farming Awareness Programme as the best practice. We decided to train the students and teachers to do the demonstration of organic

farming to the farmers from adopted village for the best practice. We trained few students from department of chemistry, botany and zoology for this practice. We also involved some NSS students for this practice. We prepared leaflet in the academic year 2016-17. We distributed it among the farmers. We also organized invitee expert lectures for students and farmers. We are planning to prepare booklet and have monthly visit to the farms and farmers. We also planned to prepared booklet of the same in Academic Year 2017-18. We are planning to do water and soil testing regularly and guide them as well.

5. Evidence of Success:

We have distributed leaflets of Organic Farming among the farmers and some of the farmers approached to the college trainers. These farmers are usually raising pomegranate orchard and onion in their farms. Some of the farmers exported their pomegranate and onion. It indicates that farmers produced export quality crop with the help of organic farming. Few farmers also start growing crops without use of harmful non-biodegradable chemicals.

5. Problems Encountered and Resources Required.

Initially it was very difficult to change the mind-set of farmers. So farmer counselling. There is less number of marketing facility available for crop raised by organic farming.

Best Practice II : Green Campus Clean Campus

1. Title of the Practice

Green Campus Clean Campus

2. Objectives of the Practice

- Make campus green by planting more trees.
- To plant rare and medicinal plant.
- To beautify campus with greenery.
- To keep campus clean

3. The Context

As College is located on barren hilly draught prone area as well in rain shadow region. It receives scanty rainfall. There is need of plantation to overcome the problem. As college resolved to do more plantation in college campus as well in adopted village. Due to cultivate more land, the farmers cut down the trees. Therefore, plantation is necessary for balance and face the challenges of Global warming. It was necessary to use available water efficiently. Therefore, we felt it our duty to develop a Green Campus where environment friendly practices need to be promote to educate students their importance for society.

4. The Practice

It was decided to plant different varieties of plant species in the college campus with the help of NSS, Board of Student Welfare and students of 'Earn and Learn Scheme ' of the college, students from earn and learn scheme, teaching staff and support staff. In the course of last one years, college has grown hundreds of new plants and trees. It has also planned to develop, Oxygen Park, lawn, botanical garden, with different species of flowering and medicinal plants. It is also planned to do proper waste management.

5. Evidence of Success

The green campus developed by college helps not only to save the environment, it also adds to the beauty of the campus. Besides providing shed to people, the plants are useful for scientific studies.

6. Problems Encountered and Resources Required

Growing and preserving plants need a lot of human resource planning. NSS, Board of Social Welfare and students of 'Earn and Learn Scheme 'were given the task of preserving the plants. Water shortage problem was overcome with drip irrigation, In summer season, water tankers were hired by the college.
